PROFESSIONAL SUMMARY

Embedded Engineer with experience developing firmware, device drivers, sensor integrations, and low-power systems for connected hardware products.

SKILLS

- C, C++, RTOS, ARM Cortex, UART, SPI, I2C, Embedded Linux, Oscilloscope Debugging, Firmware Testing

EDUCATION

B.S. Electrical and Computer Engineering, North Carolina State University, 2018

EXPERIENCE

- Embedded Engineer, TerraSense Devices, 2020-2026 - Built firmware for environmental sensors and improved battery life through sleep-state tuning.
- Firmware Developer, MicroGrid Labs, 2018-2020 - Implemented device drivers and diagnostic tools for industrial controllers.

PROJECTS

- Low-power sensor firmware with over-the-air update support and fault logging.
- Embedded Linux gateway service translating Modbus sensor data to MQTT.
