PROFESSIONAL SUMMARY

Machine Learning Engineer with 5 years of experience building supervised learning systems, feature pipelines, model evaluation workflows, and production inference services for marketplace and fintech products.

SKILLS

- Python, PyTorch, scikit-learn, XGBoost, Feature Engineering, FastAPI, MLflow, Docker, AWS SageMaker, Experiment Tracking

EDUCATION

M.S. Computer Science, Northeastern University, 2019

EXPERIENCE

- Machine Learning Engineer, FinSolve Analytics, 2022-2026 - Built credit risk models, automated feature validation, and reduced offline-to-online training drift.
- Data Engineer, MarketNest Labs, 2019-2022 - Developed batch feature pipelines with Airflow and optimized model training datasets for recommendation teams.

PROJECTS

- Real-time churn prediction service with FastAPI, MLflow registry, and feature freshness monitoring.
- Gradient boosting fraud detection model with explainability reports for analyst review.

CERTIFICATIONS

- AWS Certified Machine Learning - Specialty
