PROFESSIONAL SUMMARY

NLP Engineer specializing in document classification, named entity recognition, semantic search, model evaluation, and text preprocessing pipelines.

SKILLS

- Python, Transformers, spaCy, Hugging Face, PyTorch, Text Classification, NER, Embeddings, Elasticsearch, Model Evaluation

EDUCATION

M.S. Computational Linguistics, University of Michigan, 2020

EXPERIENCE

- NLP Engineer, Lexora AI, 2022-2026 - Built entity extraction and clause classification models for legal document review.
- Machine Learning Associate, TextSpring Labs, 2020-2022 - Developed preprocessing pipelines and annotation quality reports.

PROJECTS

- Contract entity extraction system with custom labels and confidence thresholds.
- Semantic duplicate detection pipeline for support knowledge base articles.

CERTIFICATIONS

- DeepLearning.AI Natural Language Processing Specialization
