PROFESSIONAL SUMMARY

Software Engineer with broad experience building scalable services, internal tools, test automation, and maintainable application features across product teams.

SKILLS

- Java, Python, Go, REST APIs, PostgreSQL, Distributed Systems, Unit Testing, Git, Docker, System Design

EDUCATION

B.S. Computer Science, University of California Irvine, 2018

EXPERIENCE

- Software Engineer, NovaGrid Systems, 2020-2026 - Built service APIs for asset tracking, permissions, and operational reporting.
- Associate Software Engineer, BrightWare, 2018-2020 - Maintained Java services and wrote integration tests for customer onboarding flows.

PROJECTS

- Internal service health portal aggregating metrics, deployment data, and incident links.
- Permission evaluation library with reusable policy tests and audit logging hooks.
